PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience shipping production **MERN and Next.js applications** end-to-end, from idea to deployment. Skilled in building **TypeScript, React, and REST API** features with authentication, databases, and **Tailwind CSS** responsive interfaces. Thrives in high-ownership, fast-moving startup environments with strong **independent debugging** and clean, maintainable code practices.

SKILLS

- **Languages: TypeScript**, **JavaScript (ES6+)**, Java, C++, Python
- **Frontend: React.js**, **Next.js**, **Tailwind CSS**, HTML5, CSS3, Component Architecture, Monaco Editor / CodeMirror Integration
- **Backend:** Node.js, Express.js, **REST API Design**, **Authentication (JWT, OAuth)**, Webhook Integrations
- **Databases:** MongoDB, Mongoose, **PostgreSQL (Basics)**
- **System & Core:** Data Structures & Algorithms, **API Design**, Dynamic UI State Management, Multi-Tenant Architecture
- **DevOps & Open Source:** Git, **GitHub**, Postman, **AWS (EC2 deployment)**, Docker (Basics), CI/CD (GitHub Actions), Netlify, Render
- **AI & Cloud Integrations:** n8n Workflow Automation, Webhook Pipeline Design, AI Agent Integration, Prompt Engineering Workflows, Generative AI Integration (Gemini API/Vision), RAG/AI-assisted Tooling

EXPERIENCE

Full Stack Developer, RCGemini, Hisar, IN — Apr, 2025 – Present

- Delivered **4 production-ready MERN applications** within a 3-member team, owning complete features from development and debugging to **deployment workflows**.
- Built **responsive React.js interfaces** with reusable component systems, reducing development cycle time by 30% and improving **cross-platform consistency** on all devices.
- Developed admin dashboards and real-time data workflows, improving operational visibility and overall **system usability**.
- Engineered the WealthX platform with **QR-based payments**, client payment verification, and role-based access, improving completed transactions by 40%.
- Contributed to internal **CRM development** with secure authentication and task tracking, increasing team throughput by 30%.
- Shipped frequently in an **early-stage team environment**, taking ownership of features through release and post-launch fixes.

Full Stack Developer Intern, Kodu-Powered by Dhurina, Hisar, IN — Oct, 2024 – Apr, 2025

- Developed **full-stack features** using React.js, Node.js, and MongoDB, improving application usability and responsiveness across devices.
- Optimized **frontend architecture** with reusable components, cutting development time by 30% while improving cross-device compatibility.
- Identified and fixed **application-level defects** through independent debugging, reducing reported bugs by 15% and improving system performance by 25%.

PROJECTS

BillPharma — Multi-Tenant Pharmacy Management SaaS, Solo Developer (billpharma.netlify.app) — Dec, 2025 – Present

- Designed and deployed a **production-grade multi-tenant SaaS platform** for pharmacy operations, handling inventory, billing, GST compliance, and financial analytics.
- Engineered **offline-first billing** using Service Workers and client-side storage, ensuring uninterrupted invoice generation during network failures.
- Implemented tenant-isolated architecture with **role-based access control (RBAC)**, enabling secure multi-organization usage within a single system.
- Built scalable **REST APIs** and optimized frontend performance and load times, ensuring fast and reliable user experience across modules.
- Engineered interactive UI control panels and **real-time state extraction tools** for complex multi-field forms, improving data entry speed by 40%.
- Integrated **AI-assisted inventory forecasting** and billing workflows, reducing manual data entry effort by ~60% and improving operational accuracy.
- Established **GST-compliant invoicing** with automated tax calculations aligned with Indian regulatory requirements.

Tech: TypeScript, React.js, Node.js, Express.js, MongoDB, AI Integration, Service Workers, Tailwind CSS

WealthX — Digital Product Platform with QR Payments & Client Verification (rcgemini-wealthx.netlify.app) — June, 2025

- Engineered client-facing **digital payment verification workflows** and seller management panels using React and Node.js.
- Implemented **role-based access control (RBAC)** and manual QR transaction verification to validate buyer/seller claims securely.
- Streamlined client onboarding and transaction audit trails, driving a **40% increase in verified transactions**.
- Built **responsive client dashboards** for real-time order tracking and submission history.

AI Job Email & WhatsApp Automation (n8n, AWS) — Sep, 2025

- Engineered an **automated email filtering and labeling workflow** using n8n and Gmail API on AWS to isolate high-priority job opportunities in real time.
- Integrated **WhatsApp API webhooks** to send instant notifications and auto-respond with tailored CVs or details upon client/recruiter request.
- Structured prompt parsing and **payload validation rules** to extract action items and minimize manual response latency.
- Deployed and maintained **self-hosted n8n workflows on AWS EC2**, ensuring stable webhook processing and high system availability.

EDUCATION & CERTIFICATIONS

Full Stack Development Program + Internship, Hisar, Haryana — Apr, 2025

Kodu (Powered by Dhurina)

- Completed a 1-year Full Stack Development Program followed by a 6-month Full Stack Developer Internship, building multiple MERN applications with one selected for production deployment.

Bachelor of Computer Application (BCA) — Dec, 2024

Maharshi Dayanand University (MDU), Rohtak

- Coursework: Java, C++, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming
