PROFESSIONAL SUMMARY

Software Engineer | Full Stack Developer

Software Engineer experienced in building and deploying production-grade SaaS systems end-to-end. Built and shipped BillPharma, a multi-tenant pharmacy platform with offline-first billing, RBAC, GST-compliant invoicing, and AI-assisted inventory, reducing manual effort by ~60%. Delivered CRM and transaction platforms that increased completion rates by 40% and improved operational throughput by 30%. Experienced in designing scalable APIs, optimizing performance, and solving real-world system problems using React, TypeScript, Node.js, Express, and MongoDB.

SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Java, C++, Python
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST API Design, Authentication (JWT, OAuth)
- **Databases:** MongoDB, Mongoose
- **System & Core:** Data Structures & Algorithms, API Design, Performance Optimization, Multi-Tenant Architecture
- **DevOps & Tools:** Git, GitHub, Postman, Docker (Basics), CI/CD (GitHub Actions), Netlify, Render
- **AI & Cloud:** Generative AI Integration (Gemini API), AI-assisted Development, Basic Cloud Concepts

EXPERIENCE

Frontend Developer, RCGemini, Hisar, IN

Apr, 2025 – Present

- Delivered 3 production-ready MERN applications within a 3-member team, owning feature development, debugging, and deployment workflows
- Engineered the WealthX platform with QR-based payments, transaction verification, and role-based access, improving completed submissions by 40%
- Built responsive React.js interfaces and reusable component systems, reducing development cycle time by 30% and improving cross-platform consistency
- Developed admin dashboards and real-time data workflows, improving operational visibility and system usability
- Contributed to internal CRM development with secure authentication and task tracking, increasing team throughput by 30%

Full Stack Developer Intern, Kodu-Powered by Dhurina, Hisar, IN

Jan, 2025 - Apr, 2025

- Developed full-stack features using React.js, Node.js, and MongoDB, improving application usability and responsiveness
- Optimized frontend architecture using reusable components, cut development time by 30% while improving cross-device compatibility
- Identified and fixed application-level defects, reducing reported bugs by 15% and improving system performance by 25%

PROJECTS

BillPharma — Multi-Tenant Pharmacy Management Platform, Solo Developer ([billpharma.netlify.app](#))

Dec, 2025 - Present

- Architected and launched a production-grade multi-tenant SaaS platform for pharmacy operations, encompassing inventory control, billing generation, GST compliance, taxation logic, and profit/loss financial analytics.
- Pioneered offline-first billing capability using Service Workers and client-side storage, enabling uninterrupted invoice creation during network outages — a critical differentiator surpassing existing market competitors.
- Integrated AI-powered inventory forecasting and intelligent billing assistance, reducing manual data entry effort by approximately 60% and enhancing operational accuracy.
- Implemented tenant-isolated data architecture with granular role-based access control, ensuring secure multi-organization usage within a single deployment.
- Authored the complete frontend codebase in TypeScript, maintaining strict type safety across 50+ reusable components with clean architectural separation.
- Embedded GST-compliant invoice generation meeting Indian regulatory standards, automating tax calculations and compliance documentation.

Tech: TypeScript, React.js, Node.js, Express.js, MongoDB, AI Integration, Service Workers, Tailwind CSS

RCGemini CRM System ([rcgemini-crm.netlify.app](#))

July, 2025

- Shipped a custom customer relationship management tool using React with Context API and a Node.js/MongoDB backend stack.
- Incorporated secure login mechanisms, real-time task update feeds, and automated email alert triggers, eliminating approximately 50% of manual follow-up activities.
- Crafted intuitive administrative dashboards that accelerated team response time and enhanced tracking precision.

WealthX ([https://wealthx.netlify.app](#))

June, 2025

- Produced a role-based web platform facilitating digital product distribution with manual payment verification workflows. Replaced a legacy lead capture form with an integrated backend processing flow, amplifying contact form completion rates by 40%. Orchestrated solodeployments spanning frontend architecture through backend configuration and production hosting setup.

EDUCATION & CERTIFICATIONS

FullStackDevelopmentProgram+Internship, Hisar, Haryana

Apr, 2025

Kodu (Powered by Dhurina)

- 1-year program + 3-month internship with hands-on MERN stack training; delivered several projects, with one chosen to go live in production.

Bachelor of Computer Application (BCA)

Dec, 2024

Maharshi Dayanand University (MDU), Rohtak

- Coursework: Java, C++, Systems Analysis & Design, Networking
